

GENOMIC CANCER CLINICAL TRIALS INITIATIVE

Idea generation template

The Genomic Cancer Clinical Trials (GCCTI) Initiative is led by the NHMRC Clinical Trials Centre in partnership with Zest.

The aim of GCCTI is to help Australia's cancer researchers develop concepts and grant applications for molecularly-targeted clinical trials that involve more than one of **Australia's 14 cooperative trials groups (CTGs) and more than 1 cancer type**.

This template is designed to be used by researchers or clinicians to suggest a trial concept or idea that can be considered by the Genomic Cancer Clinical Trials Initiative (GCCTI) project team and Scientific Steering Group (SSG). The GCCTI project team and Scientific Steering Committee will consider submitted ideas to determine alignment with the GCCTI objectives and scientific-approach.

Please feel free to contact Natasha Black at natasha.black@zest.com.au for further information questions.
