

IDEA GENERATION TEMPLATE

The Genomic Cancer Clinical Trials (GCCTI) Initiative is led by the NHMRC Clinical Trials Centre in partnership with Zest.

The aim of GCCTI is to help Australia's cancer researchers develop concepts and grant applications for **mutation-specific/molecularly-targeted clinical trial concepts and grant applications involving more than one primary site and more than one cancer Cooperative Trials Group (CTG).**

This template is designed to be used by researchers or clinicians to suggest a trial concept or idea that can be considered by the GCCTI Project Team and Scientific Steering Group (SSG). The GCCTI Project Team and SSG will consider submitted ideas to determine alignment with the objectives of the GCCTI and scientific-approach.

Please feel free to contact the team at info@gccti.org.au for further information or questions.

Your name

Email address

Idea overview (1 paragraph)

Molecular target(s)

Drug class(es)

Potential tumour types

CTGs that may be interested/relevant

Potential compounds (manufacturer)

Required testing (required tissue, assay)

Other requirements

Possible investigators

Suggestions for funding
